Dear Adriaan,  
I trust all is well with you. I'm getting back to you with regards to the requests below.  
Could you enlighten me, please?  
Kind regards,  
Frederic

Dear Adriaan,

Thank you for your email. May I ask you to be a little bit more specific? Are all the data pertaining to my three requests below "not publicly available"? I.e. *even* the list of the *public* funds (either European or national) that WUR has received over time to conduct research on electric fishing? That does not seem quite justifiable, so I'd like to know more about the rationale behind your refusal.

Also, I don't see why you couldn't send me the dates at which the vessels were equipped. Is there any particular reason?

Finally, I understand that nominal VMS data cannot be shared, but I'd only need anonymized ones. Does your answer remain the same?

Thank you very much for your prompt reply.

Kind regards,

Frederic

Dear Frederic,

I'm sorry but these data are not publically available.

Thank you for the slides, Adriaan.

I also look forward to your answers to my other questions.

Kind regards,  
Frederic

Dear Adriaan,

Just checking whether you did get the email below or not.

Kind regards,

Fred

Dear Adriaan,

I'm touching base with you regarding our discussion last week in IJmuiden/Amsterdam. Would you mind sharing your slides with me, please?

Also, I was wondering if you could answer a couple of questions:

- In the 2018 WGELECTRA report, Figure 5.2.1 shows the precise evolution of the number of equipped vessels over time. Would it be possible to have access to the underlying data, i.e. the date at which each vessel (nominal data) was equipped with electric trawls? We do have the list of equipped vessels, but we don't know when each of them switched from regular to electric trawling...

- Would it also be possible to access the VMS data (longest time-period and most detailed manner possible) that was used to assess the spatial footprint of electric fishing?

- Finally, is there a list of the public funds (either

European or national) that WUR has received over time to conduct research on electric fishing?

I look forward to your prompt reply.

Kind regards
